Foreword

The Texas Records Exchange System (TREx) is a web-based application designed for the exchange of electronic student records and transcripts. By using the TREx application, school registrars can electronically request and receive student records for students who have attended or will be attending Texas public schools. High school registrars and counselors also can electronically create and send official student transcripts to Texas public colleges and universities using the National Student Clearinghouse (Formerly UT SPEEDE) server.

TEA developed TREx in response to TEC 7.010 which requires all Texas public school districts, open enrollment charter schools, and Texas public colleges and universities to participate in a system for the electronic transmission of student education records.

Texas public school districts annually report all Grade 7-12 students leaving their districts. The data on school leavers include dropouts and are used to calculate dropout and high school completion rates for accountability purposes. More than half the students leaving districts move to other Texas public school districts. An automated student record exchange system enables districts to communicate with each other more effectively about students who are withdrawing or enrolling. Improved communication should improve the reliability of dropout rate calculations. Additionally, the automated system facilitates the rapid and appropriate academic placement of students enrolled in a new district and ensures continuity of services provided to students who move between Texas school districts.

The *TREx Data Standards* is intended to be used as a resource by all persons involved in the transfer of student records and transcripts using the TREx student record exchange process.

If you have any questions, please call the TREx Customer Support line at (512) 463-7246 or email TREx@tea.Texas.gov.

Refer to the TREx website at <http://tea.texas.gov/index4.aspx?id=25769817556> for training materials or updates.

SECTION 2 - TREX REQUIREMENTS AND OVERVIEW

2.1. Introduction

TREx is a web-based application hosted by the Texas Education Agency (TEA) for transferring student records electronically between Texas public school districts and open enrollment charter schools, as well as transmitting high school transcripts to Texas public colleges and universities that use the National Student Clearinghouse (NSC) SPEEDE server, formerly known as the UT SPEEDE Server.

Section

2

The TEA Student Attendance Accounting Handbook describes the following minimum information that must be transmitted when a student transfers from one Texas public school district or open enrollment charter school to another under Withdrawal Procedures.

- Student ID (Social Security Number or State-Approved Alternate ID);
- Prior ID (Social Security Number or State-Approved Alternate ID, if different from above);
- Local Student ID Number, if used;
- County-District-Campus Number;
- Campus Name and Phone Number;
- First, Middle, and Last Name and Suffix of the student;
- Gender, Ethnicity, and Date of Birth of the student;
- Current Grade Level for the student; and
- Immunization records. Texas Education Code (TEC) §25.002(a)(3).

Home Language Survey

The U.S. Department of Education, Office of Civil Rights and Texas state law require school districts to collect information about a student's language background at the time of enrollment/registration to determine whether the student is a potential English learner. When a student enrolls in a Texas school for the very first time, a home language survey is completed. If a language other than English is identified, the student shall be tested to determine the student's language classification and eligibility for placement into a bilingual education or English as a second language program. This original home language survey is retained in the student's permanent record for the duration of the student's education.

- Original Home Language Survey
- Initial/end-of-year Language Proficiency Assessment Committee (LPAC) documentation
- Parent permission/denial forms

In addition, TEC 7.010 requires the following information to be included with the student records sent through TREx. Note that the IEP may be scanned and sent as an attached file. See the section on File Requirements below. Appendix A contains a complete list of data elements that may be transmitted through the TREx application.

- Student Course or Grade Completion
- Teachers of Record
- Student Assessment Results
- Receipt of special education services, including placement in a special education program and individualized education program developed (IEP).
- Students Personal Graduation Plan

Registrars are encouraged to send all relevant information that is available through TREx when a student transfers from one school to another. While schools are not required to send copies of birth certificates or social security cards through TREx when a student transfers, these documents may be scanned and transmitted as attachments if the registrar chooses.

Please be aware if you are sending a transcript to a college or university on behalf of a student who is applying for college admission, most Texas public colleges require the following information as part of their admission process. Although Exit Level TAKS or STAAR® EOC scores will not appear on the transcript, the scores will be transmitted electronically to the college or university through the SPEEDE server if they are populated on the xml file.

- Class Size
- Class Rank
- Date of Class Rank
- Date of Graduation
- Exit Level TAKS or STAAR® EOC score by Subject

The Student Attendance Accounting Handbook, Part 3 Section 3-9, states enrollment by a student in a school district constitutes authority for the sending district to release the education records of that student, regardless of whether parental authority has been received. (The federal Family Education Rights and Privacy Act (FERPA) 34 CFR Part 99, 99.31(a)(2) and 99.34)

By law (TEC §25.002(a-1)), a district must respond to a request for a student record from the receiving district within ten working days after the date the request for information is received. The timely transfer of a student record is important for a student's appropriate instructional placement for continued education as well as for various reports and entries on the state assessment forms. TREx facilitates the process of responding to and fulfilling requests for records within the required timeframe.

2.2 Responsibilities

The following sections describe the responsibilities of each participant within the TREx process.

SCHOOL DISTRICTS AND CAMPUSES

RESPONSE TO REQUEST

Districts must ensure that copies of student records are made available to schools to which students transfer. The transfer of a student record to another school district/charter may not be withheld for any reason. By law, (TEC §25.002(a-1)), a district must respond to a request for a student record from the receiving district within ten working days.

PRIVACY

TEC §25.002 and FERPA 34 CFR Part 99, 99.31(a)(2) and 99.34 protect the right of access to the student record. Districts must protect the confidential information on student records and transcripts from unauthorized individuals. TREx encryption ensures protection of the data during transmission and within the TREx process; however, once the data are downloaded, data security becomes the responsibility of the receiving school district/campus.

LOCAL STUDENT INFORMATION SYSTEM

The student record information transmitted through TREx is created locally by extracting data from the local student information system. It is the responsibility of the district to implement software that will extract the required data from the local student information system and create an xml file in the prescribed format for uploading to TREx.

The receiving district/campus can download and store the data once the district/campus accepts the student record/transcript through TREx. TREx does not automatically update the receiving campus' student information system. However, additional time and effort may be saved if the district chooses to modify the local software extract to populate the local student information system upon receipt of the requested information.

Note: It is important to remember that data in TREx are transitory. The data held for campus/district review are automatically purged from TREx within a set number of days.

DATA ACCURACY

Campuses and districts are responsible for the accuracy and validity of the data in the student records and transcripts. T REx includes edits and validations of the data that are related to formatting, business rules, and data integrity for transmission and storage purposes. T REx edits and validations are not related to the accuracy of the data.

Sending districts and campuses certify the content of their T REx data transmissions (high school transcripts) by electronically signing the "Registrar's Statement of Approval" available in T REx. The electronic signature certifies that the district has taken measures to verify the accuracy and the authenticity of the data in the high school transcript. The electronically signed form is stored on a secured TEA server and a copy is downloaded by the receiving registrar.

2.3 TEAL Approval

Districts and campuses obtain access to the T REx application through the Texas Education Agency Secure Environment (TEAL) authentication approval process. Each T REx user must request access through the TEAL Account User and Account Management process. After logging into TEAL, select "My application Accounts" from the Self-Service menu.

The Superintendent or authorized designee must approve all TEAL authorization requests before the requests are sent to TEA for approval.

Note: Districts and campuses must submit T REx requests for TEAL access through the automated process available from <https://pryor.tea.state.tx.us/>. The T REx project does not accept hardcopy TEAL request forms.

EQUIPMENT REQUIREMENTS

- Scanner

SOFTWARE REQUIREMENTS

- Microsoft Internet Explorer (IE) version 6.0 or higher
- Email access

MINIMUM SYSTEM REQUIREMENTS

- The PC must have Internet access
- The Internet browser must be able to support SSL 2.0 standards – 128 encryption

FILE REQUIREMENTS

- The suggested default file location for attachments (scanned documents) is: C:\T REx.
- File size limitation: 32MB

- Extract files are submitted to TREx with the following naming convention:

####LastName_FirstName_descriptor

- #### = last 4 digits of the Student ID
- LastName = student's last name

FirstName = student's first name

Descriptor = stu (student record)

| Order | 1 | 2 | 3 | 4 | 5 | 6 |
|-------------|-----------------------------------|----------------------|------------|--------------------------|------------|---------------------------|
| Description | Last 4 digits of Student ID | Student Last Name | underscore | Student First Name | underscore | 3-character descriptor |
| Example | 1234 | Doe | — | John | — | stu |

Example: 1234Doe_John_stu

Note: Extract files do not require an extension of .XML to be accepted by TREx. As long as the XML format meets the schema requirements, TREx will accept the file with any extension.

- Attachments are submitted to TREx with the following naming convention:

####LastName_FirstName_Descriptor##

= last 4 digits of the Student ID

LastName = student's last name

FirstName = student's first name

Descriptor = le (Limited English Proficiency (LEP) attachment)

im (Immunization record attachment)

gt (Gifted/Talented (GT) attachment, such as a GT profile)

ms (Miscellaneous record)

ot (Other – to be used for any document that the district is uncomfortable giving any indication of what is contained within the document)

tl (Transcript Legend)

- two-digit generation number (01-99)* to allow for multiple attachments within type

**Note: Numbers 81-89 under ms (miscellaneous record) are strictly reserved for Disciplinary Action attachments. Numbers 91-99 under ms (miscellaneous record) are strictly reserved for Individual Education Plan (IEP) attachments.*

| Order | 1 | 2 | 3 | 4 | 5 | 6 | 7 |
|-------------|-----------------------------|-------------------|------------|--------------------|------------|------------------------|---------------------------|
| Description | Last 4 digits of Student ID | Student Last Name | underscore | Student First Name | underscore | 2-character descriptor | 2-digit generation number |
| Example | 1234 | Doe | - | John | - | ot | 91 |

Example: 1234Doe_John_gt01 (indicates the attachment is a GT record)

1234Doe_John_ms91 (indicates the attachment is related to an IEP)

1234Doe_John_ms01 (indicates miscellaneous attachment is not IEP-related)

RECORD OWNERSHIP AND STORAGE

The permanent retention of student records and transcripts continues to be the responsibility of districts/campuses and does not change with the implementation of TREx.

Districts must maintain high school transcripts permanently (19 Texas Administrative Code (TAC) §74.14(a)). TEA does not store the transcript or academic achievement record (AAR) data transmitted through the TREx system. TREx automatically purges high school transcript data in the same manner and timeframe as student record extract files.

2.4 Public Colleges and Universities

Public colleges and universities are responsible for the timely processing and acknowledgement of student transcript records received from TREx through the NSC SPEEDE server.

2.5 Education Service Centers (ESCs)

TRAINING TO DISTRICTS AND CAMPUSES

While campuses and districts process the transfer of student records and high school transcripts, the ESCs provide support and training on the TREx application and processes to districts.

The instruction on TREx provided by ESCs to school districts and campuses may include:

- overall data flow and process;
- data element definitions;
- data transmission requirements; and
- reporting options

In addition the T R E x User Guide and Video Tutorials are available on the TEA T R E x web site at [http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_\(TREx\)/TREx_Training/](http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_(TREx)/TREx_Training/). TEA also provides T R E x Customer Support by phone at (512) 463-7246 and email at TREx@tea.Texas.gov.

TEAL APPROVAL

ESCs obtain access to the T R E x application through the TEAL authentication approval process. Each T R E x user must request access through the TEAL Account User and Account Management process. After logging into TEAL, select “My application Accounts” from the Self-Service menu.

The Executive Director or authorized designee must approve all TEAL authorization requests before the requests are sent to TEA for approval.

2.6 Texas Education Agency

TEA is responsible for the implementation, administration, and maintenance of the T R E x application.

PRIVACY

TEC 7.010 mandates that TEA collect and transfer student data for educational purposes. The federal Family Education Rights and Privacy Act (FERPA) regulations mandate that personally identifiable student data be kept confidential. TEA must follow all FERPA requirements protecting the confidential information in student records and transcripts being sent through the T R E x application. All users of the system must also adhere to the FERPA requirements as well.

SECURITY

TEA is responsible for the security of the data while in transit. T R E x has multiple levels of system and application-level security to protect the privacy of student education records as established by FERPA including:

- T R E x has a multi-layered security protocol that safeguards the network.
- Authentication blocks users until they are approved by the TEAL (Texas Education Agency Login secure environment) system.
- Extensive Access Control Lists (ACLs) apply policies that keep users from reaching restricted resources.

TRAINING TO ESCS

TEA provides training and training materials for the TREx application to the ESCs and provides information to assist ESCs train the districts and/or campuses. TEA and ESCs have an established relationship in providing a train-the-trainer approach. This same training approach is used with the TREx application. Training materials may be accessed from the TREx project web site at: [http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_\(TREx\)/TREx_Training/](http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_(TREx)/TREx_Training/).

RECORD STORAGE

TEA stores all TREx data, including attachments extracted from a local student information system, in a relational database within TREx for a limited number of days. TEA sets and maintains this parameter.

Note: At no time during the transmission or the temporary storage of the data does TEA take ownership of the data.

The permanent retention of student records and transcripts continues to be the responsibility of districts/campuses and does not change with the implementation of TREx.

TEAL REQUEST PROCESSING

The TEA Computer Access group approves and notifies the requestor by email when the TEAL ID is ready to use. (The email notifications from the Computer Access group include basic instructions for the initial login and password change.)

2.7 TREx Roles

Following is a list of TREx roles and privileges.

| TREx Role Name | Examples of Users | Privileges |
|--|---|---|
| Campus Registrar/Counselor | Counselors, Registrars, Admissions Office staff | Send, receive, accept, download, view, track, and approve all information in student records or transcripts for a campus; generate and view TREx reports for a campus; manually enter student record/transcript data for a campus; attach TEA-approved graduation diploma seals and send official high school transcripts for graduates at a campus |
| Campus Registrar/Counselor Multiple Campuses | Counselors, Registrars, Admissions Office | Send, receive, accept, download, view, track, and approve all information in student records or transcripts for a campus; generate and view |

| | | |
|--|--|--|
| | staff responsible for more than one campus but not for a full district | TREx reports for a campus; manually enter student record/transcript data for a campus; attach TEA-approved graduation diploma seals and send official high school transcripts for graduates at more than one campus |
| Campus View-Only | Principal, Vice-Principal, Secretary | Track and view TREx transaction history logs for a campus; view TREx summary reports |
| District Registrar/Counselor | District-wide Admissions staff or District Registrar | Send, receive, accept, download, view, track, and approve all information in student records or transcripts for all campuses within a district; generate and view TREx reports for all campuses within a district; manually enter student record/transcript data for all campuses within a district; attach TEA-approved graduation diploma seals and send official high school transcripts for graduates for any campus within a district |
| District Registrar/Counselor Multiple Districts | Counselors, Registrars, Admissions Office staff responsible for more than one district | Send, receive, accept, download, view, track, and approve all information in student records or transcripts for all campuses within a district; generate and view TREx reports for all campuses within a district; manually enter student record/transcript data for all campuses within a district; attach TEA-approved graduation diploma seals and send official high school transcripts for graduates for any campus within multiple districts |
| District View-Only | District staff, TREx Coordinator | Track and view transaction history logs district-wide (all campuses within a district); view TREx summary reports for all campuses in the district |
| ESC View-Only | ESC TREx Coordinator/Trainer | Track and view transaction history; view TREx summary reports for all districts or campuses within the ESC region |
| Vendor | SIS Vendors | Validate XML extract files against TREx schema. |
| TEA View-Only | Agency TREx staff and managers | Track and view transaction history logs; view TREx summary reports for all campuses/districts within the state |
| TEA Administrator | Agency technical staff supporting TREx | Perform technical administrative and troubleshooting functions on a statewide level; generate and view reports |

2.8 TREx Process Overview

As Texas students transfer between school districts/campuses or move on to a college or university after graduation, Texas public school registrars receive requests for the transfer of

student records to school districts and high school transcripts to institutions of higher education (IHE). These types of record exchange requests occur year-round, with specific patterns of heavier activity based on student semester completion. TREx is designed to meet the requirements for districts and campuses at all times of the year.

Although TREx provides a manual entry capability to create student records or transcripts, most districts transmit the data through TREx in an XML-based extract file. The file is referred to as an “extract” file because it is created through a local vendor-supported process that extracts the student record or transcript information from a district’s local student information system.

On a per-student basis, districts/campuses upload data (extract file) into TREx and transmit the data to the TREx server. TREx sends the data to the receiving district/campus or to the NSC SPEEDE server (if the extract file is for a transcript) and subsequently deletes data within a set number of calendar days.

The number of days that TREx holds a request or extract file is limited from the time it is initially transmitted to TREx. Each TREx transaction is date-stamped, thereby informing users of the number of days remaining before TREx purges the data.

2.9 Student Records

In TREx, a “student record” is an individual student record sent between one Texas public school district/campus and another Texas public school district/campus. A student record in TREx may apply to grades EE through 12 and should include data for all of the grade levels, if available.

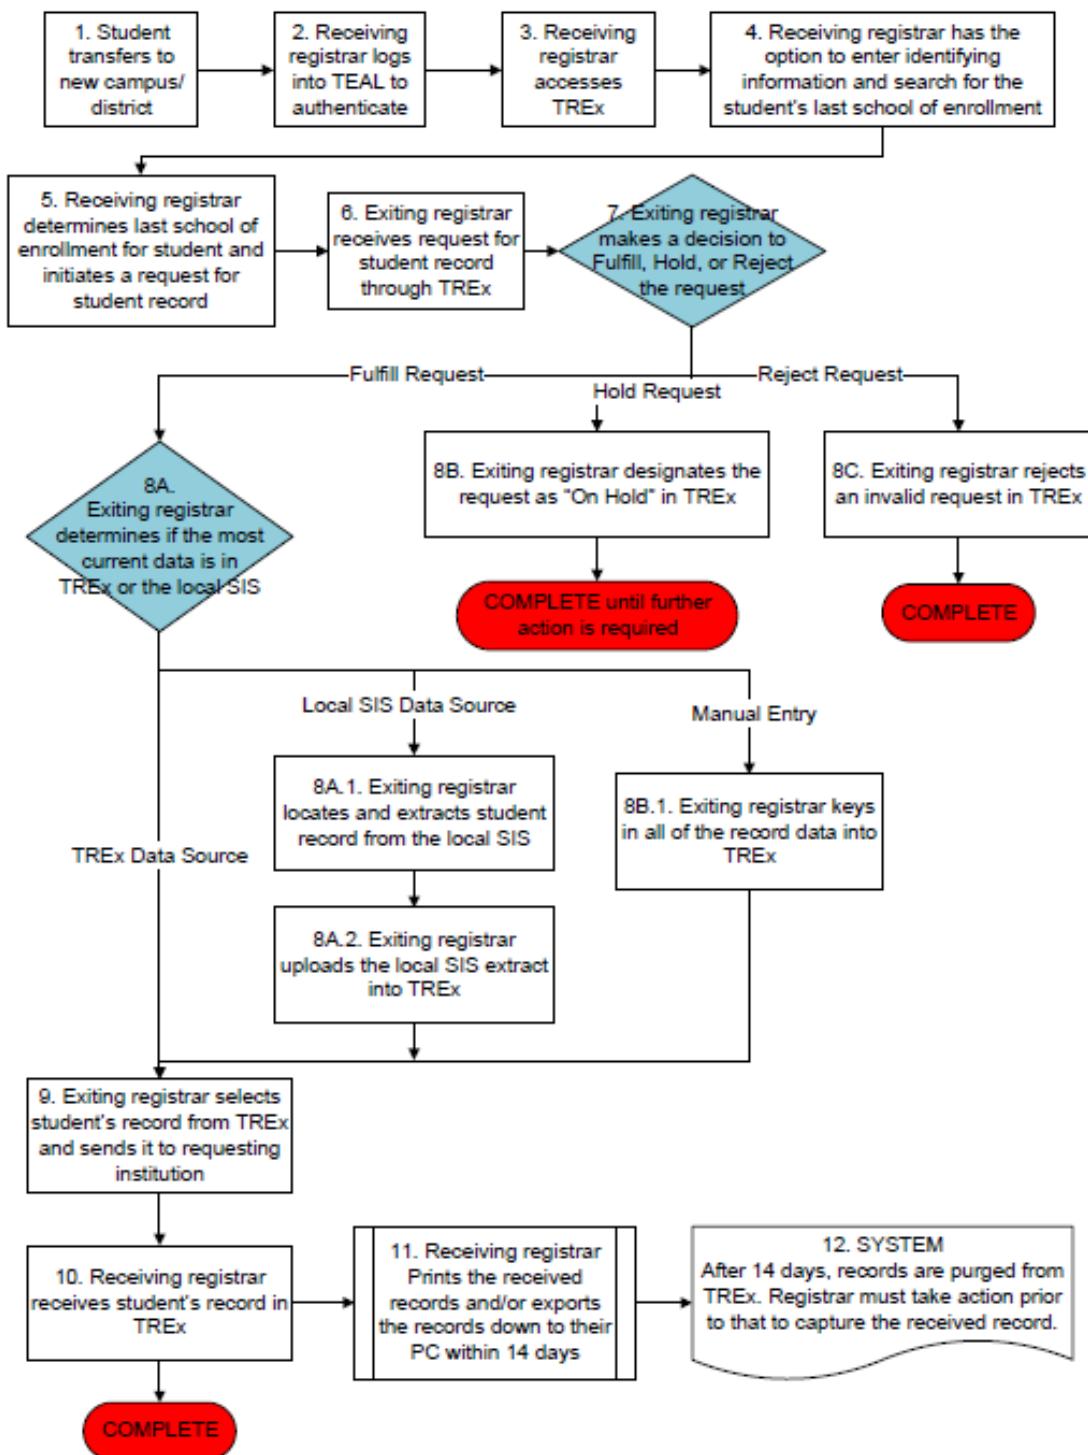

When a student record exchange request is an inbound type, it originates from a receiving district. In other words, the student has transferred and the district receiving that student needs his or her student records from the campus of last enrollment. The receiving registrar creates a record request in TREx, which is transmitted to the student’s previous campus.

TREx notifies the exiting registrar (at the campus of last enrollment) by email that a request exists if the campus does not open the request within 24 hours of its being sent. The exiting registrar clicks on the request link from the TREx home page and verifies through local records that the student did attend that campus. If the request is not valid for that campus (i.e., the student was not enrolled at the campus), the exiting registrar rejects the request. TREx logs the rejected transaction status and sends the receiving registrar notification.

If the request is valid, the exiting registrar creates an extract file from the local student information system and transmits the student record through TREx. If the request is valid but the student record is not available from a local student information system, the registrar can manually enter the data in TREx.

STUDENT RECORD TRANSMISSION PROCESS FLOW DIAGRAM

Following is an illustration of the general TREx process flow for Student Records transmitted between Texas public school districts:

2.10 High School Transcripts

A high school transcript record in TREx refers to the official high school transcript or academic achievement record (AAR) for Grades 9-12. The transcript is an official and permanent record of a student's academic performance during high school and, in some cases, of high school courses completed in middle school or junior high school (TEC §28.025(e)).

When the request is an outbound type (a high school student requesting a transcript be sent to a college), the exiting registrar uploads the student's high school transcript to TREx via an extract file of data from the local student information system and selects the college.

Sending districts and campuses certify the content of the high school transcript data by electronically signing the "Registrar's Statement of Approval" available in TREx. The electronic signature certifies that the district has taken measures to verify the accuracy and the authenticity of the data in the high school transcript.

As with student records, registrars can manually enter transcripts in TREx if the data are not available in the local student information system.

Note: The campus or district procedures for how high school students request a transcript be sent to a college or university remain unchanged; only the means by which the request is fulfilled changes with the implementation of the TREx system.

An interface into TREx from authorized external applications such as ApplyTexas has been added. A student using such an application may create an electronic request for a transcript to be sent to a college or university. The resulting request is placed in the student's high school campus TREx inbound request queue. The high school registrar may then process this request in the same manner as if the request was made by the student in person.

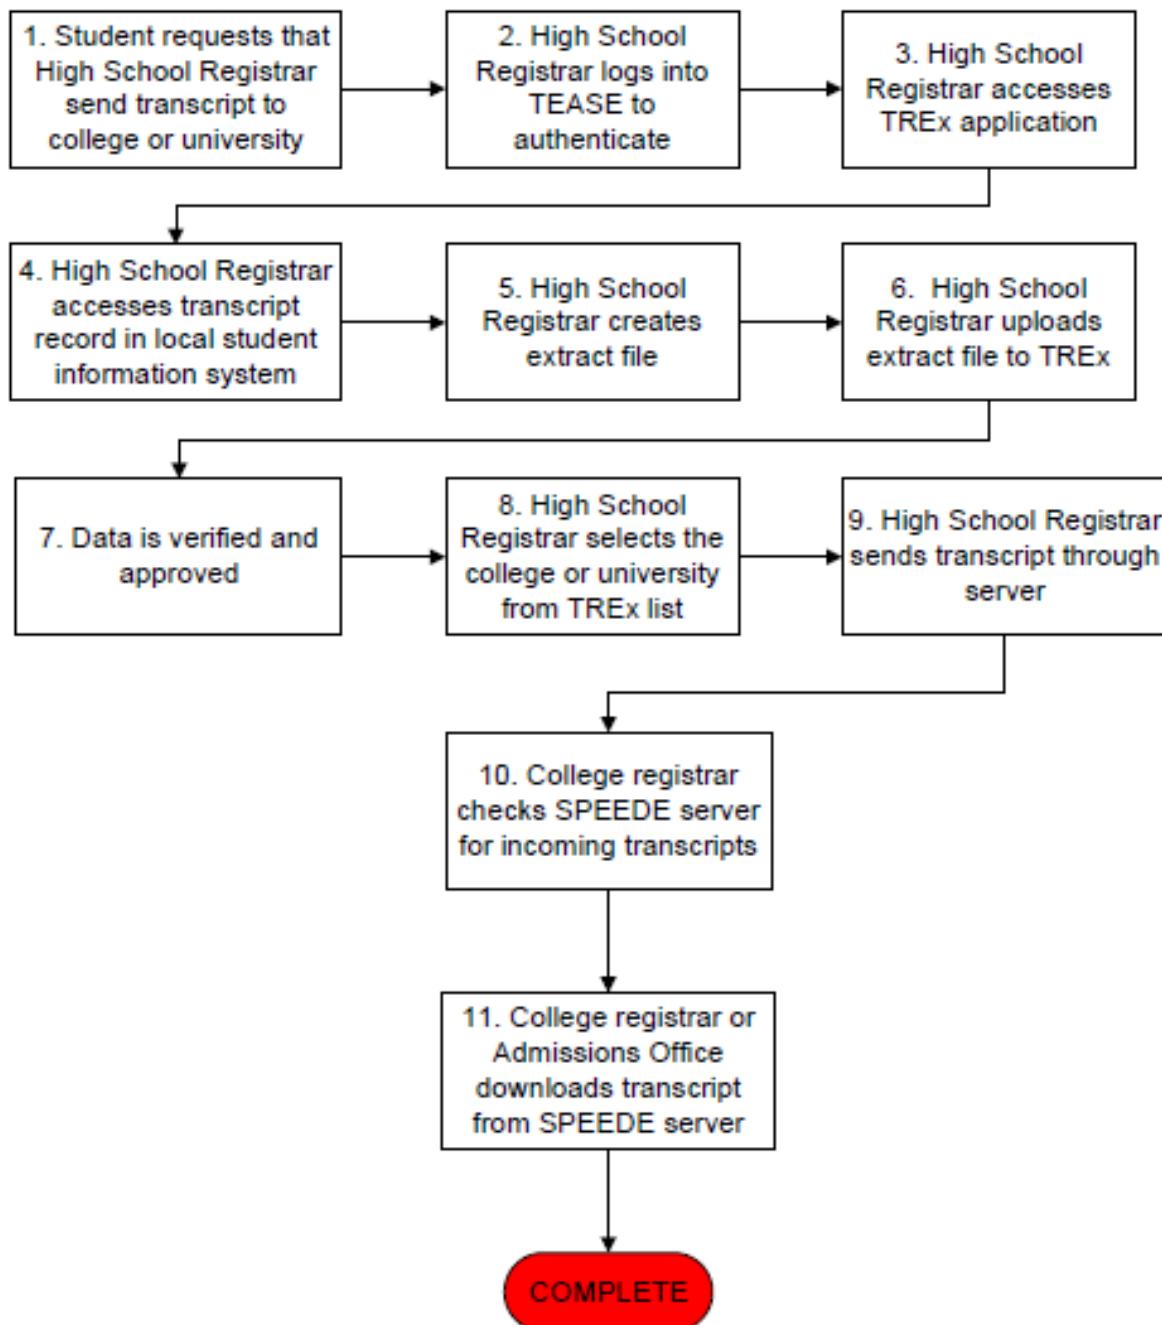

TREx presents the transcript in the required standard AAR format with the approved graduation seal.

TREx transmits the high school transcript to the NSC SPEEDE server, which then transmits it to a designated server at the receiving college or university.

Note: TREx includes a campus/district transcript legend option that creates a pdf, which can be attached to all transcript records. Since there is no national standard for transmission of the pdf file format and public colleges and universities in Texas are not prepared to receive such a file via the NSC SPEEDE Server, this document should not be transmitted through TREx to the NSC SPEEDE Server.

HIGH SCHOOL TRANSCRIPT TRANSMISSION PROCESS FLOW DIAGRAM

Following is an illustration of the general TREx process flow for High School Transcripts being sent to colleges and universities from Texas public high schools:

TREx Functionality

As the workflow diagrams illustrate, functionality within TREx includes the ability to search student records, upload the XML-based extract files from local student information systems to TREx and transmit the extract file to the selected public school or public IHE. Additional TREx functionality includes the ability to review data received, download the data, fulfill a request, hold a request (for example if current coursework in the student record requires updating with final grades), and reject a request if it is invalid. An example of an invalid request is a student record request for a student who did not attend the campus receiving the request for a student record.

2.11 Managing Student Records

TREx provides a user home page that includes a group of Managing Student Records functions. This group of functions allows the users to search through student records and transcripts (if applicable) within their Manage Records folder on the home page.

Registrars can view the student record or transcript, as well as upload to TREx or download records from TREx for their campus/district (as defined by their TREx role). Additionally, registrars can track inbound and outbound requests by their tracking number and view the full transaction history of those requests from the Manage Student Records page.

2.12 Send Record Request

TREx is designed to meet the needs of both the exiting and receiving registrars in locating the correct student records. For a receiving registrar, the TREx process begins with a request created in TREx that is presented to an existing registrar. A TREx request includes the following key elements:

- Student ID;
- First Name, Middle Name, Last Name, Suffix (generation code);
- Date of Birth;
- Gender;
- Ethnicity; and
- Information of the requesting district/campus.

A receiving campus can retrieve the request from the TREx home page. TREx sends an email notification to receiving campuses if no transaction status change is logged after 24 hours of receipt of an inbound request.

2.13 Search Capabilities

TREx interfaces with another TEA application to assist registrars in searching for the last campus attended by for a student. Registrars perform searches by providing key elements found in the request itself. If the student record exists for a campus, TREx displays a single student, or a list of students and the registrar can select the correct student. If no students match the request, the registrar must rely on alternate means to obtain the information, such as searching by student ID or name.

TREx also provides the ability to search for institutions by type (PK-12 or post-Secondary), campus ID, campus name, and city.

2.14 Manual Data Entry

When the exiting registrar fulfills a request for the student record or transcript, the exiting registrar extracts the data from the local student information system and uploads the data to TREx. If the data are not in the local student information system, the exiting registrar can enter the data on the manual data entry forms available within TREx.

The manual data entry screens are organized by data types, such as student identification or demographic data. Drop-down selection lists are available for those data elements that are a CODED Type. For data elements with a TEXT Type, free-form fields are available; each is limited by the length specified in the TREx Data Standards.

TREx validates the data and then creates an XML file that then can be processed as those XML extract files generated through the SIS extract process.

2.15 Attachments

In some cases, registrars want to attach information to a student record. If attachments are needed, attachments in TREx can be sent in the following formats:

- PDF format;
- MS Word (.doc) files;
- MS Excel (.xls) files; and
- Data file (such as ASCII data file) in another application.

Examples of attachments in the TREx process include:

- Immunization records if the data are not available electronically;
- Personal graduation plan, if applicable; and
- Individualized Education Plan (IEP), if applicable.

An example of an attachment that is prohibited in the TREx records exchange process is video files.

Note: For information on file naming conventions for TREx attachments, please reference "File Requirements" in this chapter.

2.16 Email Notifications

TREx sends email notifications for any type of change in status, such as received, accepted, fulfilled, and denied. Following is an example of an aged email notification:

Your TREx account shows inbound student records, transcripts, and/or requests from other districts and campuses that have not shown any transaction status change in over 24 hours after having been sent to your campus or district.

Please log in to the TREx system and review the Items Requiring Attention portion of the TREx home page for a full listing of transaction statuses. At the time of this notification, this includes:

AUSTIN H S (AUSTIN ISD)

4 Inbound Requests
4 Inbound Records/Transcripts
4 Rejected Outbound Requests
1 Rejected Outbound Records/Transcripts

To access TREx, log on through TEAL at: <https://pryor.tea.state.tx.us/>

TREx automatically sends the email notification throughout the record transfer process to campuses or districts if the receiver does not process inbound requests or records in the queue within 24 hours of transmission. (TREx sends these email notifications to all participants at the district or campus as set by their TREx role and privileges.)

TREx displays inbound records or requests in rows with each row displaying the delivery time, last name, first name, student ID, and a link to the transaction history.

2.17 Tracking Transactions

The Tracking Request and Records group of functions in TREx provide users with a dynamic mechanism for tracking the progress and status of pending outbound and inbound requests.

TREx provides the ability to track each transaction throughout the process flow by a unique transaction ID assigned by TREx. This is like many on-line mail delivery tracking applications.

Additionally, TREx logs each transaction status in a permanent transaction log. The transaction history includes:

- Date stamp of request submission;
- Date stamp of receipt of request;
- Date stamp of rejection.
- Date stamp of transmission.
- Date stamp of acceptance/retrieval by receiving school.
- Date stamp of transmission failure; and
- Date stamp of purge from TREx.

TREx does not permanently store the student record or transcript files. Only the transaction history is saved in TREx.

2.18 Reports

TREx includes dynamically generated reports that may be used for evaluation of general performance and electronic transfers.

Examples of TREx reports include:

- Printable PDF of student record and transcript together for Grades 8-12;
- Printable PDF of student record alone for Grades PK-7;
- Printable PDF of high school transcript only Available *in Phase 3*;
- Tracking Details by Transaction;
- Activity Summary by Time Periods (day, week, month, quarter, year);
- Activity Summary by Specific Date;
- Activity Summary by Destination;
- Activity Summary by Status Type Available *in Phase 3*;
- Transaction List by Student;
- Top 10 Record/Transcript Sources;
- Top 10 Record/Transcript Destinations;
- Top 10 Request Sources; and
- Top 10 Request Destinations.

Additional printable screens or views available in TREx include:

- Printable example of XML extract file;
- Printable screen listing error messages from Validation Tool for validation of XML schema;

- Printable screen listing validation warnings for minimum data for student record;
- Printable screen listing validation warnings for recommended data for student record;
- Printable screen listing validation warnings for minimum data for an interim high school transcript;
- Printable screen listing validation warnings for recommended data for an interim high school transcript;
- Printable screen listing validation warnings for minimum data for a final high school transcript; and
- Printable screen listing validation warnings for recommended data for a final high school transcript.

Additionally, TREx allows campuses and districts to access user-initiated data reports.

For more information on TREx functionality, you may access the TREx Users' Guide from the project web site:

[http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_\(TREx\)/TR_Ex_Training/](http://tea.texas.gov/Reports_and_Data/Data_Submission/Texas_Records_Exchange_(TREx)/TR_Ex_Training/)

SECTION 3 - DATA ELEMENTS AND CODE TABLES

3.1 Introduction

TREx is a web-based application using an Extensible Markup Language (XML) schema, which is a defined structure based on standard tag-based formatting instructions. XML applications work with a schema to allow institutions to transfer data in a format (extract file) that will be understood between varying applications.

Section

3

An XML schema is comprised of elements, also known as data elements.

Elements can be blank, required, or optional as specified by the schema. Elements also can be repeated if declared in the schema. An example of this type of data element is a course grade. Other elements can be limited to a single instance by the schema. An example of this type of data element is the student's name.

3.2 Data Elements

Data elements that are shown as coded, refer to enumerated values for data types within the schema, which is like using a code table. These are included in or defined as part of an XML Simple Type. To reuse common data elements (such as Address, City, StateProvince and PostalCode), simple types are grouped within a Complex Type. A data element is further defined by the related complex type within the schema.

A legend of the information found on each data element definition follows:

| Information | Description |
|--------------|--|
| Common Name | Common name of the element, many of which follow PEIMS and AAR standards |
| XML Name | XML name or tag for the data element as found in the XML schema |
| Complex Type | Name of the related XML complex type as found in the XML schema |
| Date Issued | <p>Date the new data element was created and added to the data standards. This date is populated with the next published version date of the data standards.</p> <p><i>Ex. DS updated 3/12/21 but publish date is 7/1/2021, the date entered would be 7/1/2021.</i></p> <p><i>Note: No further updates are required to this field after initial completion. Do not complete "Date Updated" field when initially completing this field.</i></p> |

| Information | Description |
|----------------------|--|
| Date Updated | <p>Date the data element is being updated because of a change. This date is populated with the next published version date of the data standards.</p> <p><i>Ex. DS updated 3/12/21 but publish date is 7/1/2021, the date entered would be 7/1/2021.</i></p> |
| Definition | Meaning of the data element |
| Special Instructions | Additional information or edit criteria for the data element, when applicable |
| Element ID | <p>Unique ID assigned to the TREx data element and formatted as TE--. (Reference to PEIMS data element number in the form “E---“is included if applicable.)</p> |
| Code Table ID | <p>Unique ID assigned to the TREx code table and formatted as TC--. (Reference to a PEIMS code table that includes the same codes for this data element in the form “C---“is included if applicable.)</p> |
| Required | <p>Indication whether the field is required or optional</p> <ul style="list-style-type: none"> • Yes - the element is required; if the requirement is only for specific grade levels, this is noted; NA may be entered if data are not available/applicable • No - the element is optional and may be left blank unless specified otherwise in an edit or validation rule <p><i>Note: If a field is shown as not required but data are available and relevant to the accuracy and completeness of the student record or transcript, it is the responsibility of the campus to include these data. Examples include indicators for ESL, Bilingual, GT, CTE, At Risk, Title I Part A, Special Education, IEP, Personal Graduation Plan, Migrant, and Homeless.</i></p> |

3.3 TREx Code Tables

Data elements that are shown as **coded** are included in or defined as part of an XML Simple Type. To reuse common data elements (such as Address, City, StateProvince and PostalCode), simple types are grouped under a Complex Type. A data element is further defined by the related complex type within the schema.

Following is a legend for the information found in each code table.

| Information | Description |
|---------------------------------|--|
| Table ID | TREx unique Code Table ID number. If a related PEIMS Table exists, it is shown in parentheses. |
| Name | Common name of the coded data |
| XML Name | The XML name or tag as shown in the schema |
| Simple Type & Applicable Record | Simple Type association as shown in the schema and indication of data relationship to Student Record and/or AAR Transcript |
| Date Issued | <p>Date the new code table was created and added to the data standards. This date is populated with the next published version date of the data standards.</p> <p><i>Ex. DS updated 3/12/21 but publish date is 7/1/2021, the date entered would be 7/1/2021.</i></p> <p><i>Note: No further updates are required to this field after initial completion. Do not complete "Date Updated" field when initially completing this field.</i></p> |
| Date Updated | <p>Date the data element is being updated because of a change. This date is populated with the next published version date of the data standards.</p> <p><i>Ex. DS updated 3/12/21 but publish date is 7/1/2021, the date entered would be 7/1/2021.</i></p> |

| ASSESSMENT-SCORE is the scale score earned by the student on the assessment instrument or test. | | | | |

Special Instructions

For TAKS tests, include the actual (scale) scores and not an asterisk. For lower grade levels if only a mastery indicator is available, code Y if Mastery Indicator = 1. Code N if mastery indicator = 0.

For elementary grade levels, if only the mastery indicator is available, code Y if Mastery Indicator = 1. Code N if mastery indicator = 0.

For TAKS-Alt assessments where Score code = G and no scaled scored was received from Pearson, code Y if Mastery Indicator = 1. Code N if mastery indicator = 0.

Exit-level TAKS and STAAR EOC data appear on the student record and will be transmitted to colleges and universities through SPEEDE if provided. Scores will not appear on the printed AAR.

If assessment score is provided, then the test name, test date and STAAR Performance Level are required. This data element may be repeated for each assessment.

May include any of the following characters, in addition to the space character:

ABCDEFGHIJKLMNPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz0123456789 ~ ! @ # \$ % ^ & *
() - _ + = : ; " ' , . / < > ?

May not include the following characters: \{ } [] |

| Definition | | | | |
| COURSE-CREDIT indicates the number of units awarded to the student for completion of a course. | | | | |
| Special Instructions | | | | |
| Course completion is defined by the local district. This field can be blank only if the coursework is in progress; otherwise, all completed coursework should reflect the appropriate credit awarded. If a class is failed, the credit earned is shown as 0.0. TEA accepts only full or half credits; the last digit can be 5 or 0 only. Course credit data cannot be deleted from a transcript once credit has been awarded to a student. | | | | |

Definition

CPR-INSTRUCTION MET-DATE is the date (month and year) the student completed the CPR instruction required by TEC 28.0023.

A school district or an open-enrollment charter school must provide instruction to students in grades 7, 8, 9, 10, 11, or 12 in cardiopulmonary resuscitation (CPR) (19 TAC §74.38). The completion of CPR instruction must be entered in the student record, regardless of the grade level in which the instruction was completed. Additionally, a student who completes the required CPR instruction in Grade 9, 10, 11, or 12 shall have the completion of the instruction clearly indicated on the academic achievement record (TAC §74.5).

| CRISIS-CODE | CrisisIndicator | StudentCharacteristicsType | 6/1/2020 | 9/25/2020 |
| Definition | | | | |
| CRISIS-CODE indicates a state health or weather-related event that impacts a group of students, and may require additional funding, educational, or social services. The event may or may not cause the student to leave the district or campus of residence. A crisis event is designated by the Commissioner of Education. | | | | |
| Special Instructions | | | | |
| The data transmitted is based on the code table, which is populated as events occur that will require state reporting. After the commissioner of education declares a crisis, the data may be transmitted via TREx for the affected students based on the guidance from TEA. Otherwise, if a student is not affected by a declared crisis, then this field may be left blank. | | | | |

| DISCIPLINARY-ACTION-CODE | DisciplineActionCode | DisciplineActionType | | | |
| Definition | | | | | |
| DISCIPLINARY-ACTION-CODE indicates the type of an unexpired disciplinary action taken for a student. This disciplinary event must be unexpired, i.e., the event must be applicable to the timeframe in which the student record is being transferred to another district/campus. | | | | | |
| Special Instructions | | | | | |
| TEC §37.022(b) states “If a district or school takes disciplinary action against a student and the student subsequently enrolls in another district or school before the expiration of the period of disciplinary action, the governing body of the district or school taking the disciplinary action shall provide to the district or school in which the student enrolls, at the same time other records of the student are provided, a copy of the order of disciplinary action.” | | | | | |

| Definition | | | | | |
| FOSTER-CARE-INDICATOR-CODE indicates whether a student is in the conservatorship of the Department of Family and Protective Services (DFPS) currently, or for certain students that were previously in the conservatorship of DFPS. | | | | | |
| Special Instructions | | | | | |
| <p>Foster Care status should be handled with the utmost sensitivity and in accordance with all FERPA guidelines. Foster Care status is included as a part of the TEx records transfer to aid supportive and smooth school transitions. Each school district and open-enrollment charter is required to appoint a foster care liaison to facilitate successful enrollment and transfers for students in foster care (TEC 33.904). Additionally, there are several statutory requirements specifically for students in Texas Department of Family and Protective Services (DFPS) conservatorship, 'foster care'. This information is provided to support districts in advancing the educational achievement of students. Ensuring that students benefit from these provisions, receive additional support, if needed, and experience a positive-supportive school environment is important.</p> <p>In some instances a student may return home or find a permanent placement during the school year and therefore <i>no-longer</i> be in 'foster care' although it is indicated on the student's TEx academic record at the time of transfer during that school year. Please handle all foster care information with extreme sensitivity. It is important that all students, regardless if the student is currently or was previously in the conservatorship of the DFPS, receive appropriate, sensitive and timely services to advance their educational progress.</p> | | | | | |

| SPECIAL-EXPLANATION-CODE | Explanation | CourseType | |
| Definition | | | |
| SPECIAL-EXPLANATION-CODE is a description authorized by TEA as a means to document on the transcript (AAR) specific information regarding the course to which the code is associated. Examples include explanation codes for course credit earned in middle school or at a college-level. | | | |
| Special Instructions | | | |
| More than one SPECIAL EXPLANATION CODE may be included with a Course Type. For example, if a student earns credit for Algebra I in middle school as an honors course, codes H and J may be included as special explanations for that course. | | | |
| Note: The Special Explanation Codes will be expanded to allow a length of two characters starting with the 2010 – 2011 school year. | | | |

SECTION 4: XML

4.1 TREx XML Standards Overview

XML schemas function as models for describing the structure of the records being extracted and transmitted through TREx. This includes:

- the sequence in which elements appear;
- the interrelationship between different elements, including parent and child relationships and nesting levels; and
- the types of data that are contained in elements or attributes.

The *TREx Data Standards* manual provides information on the data elements, coded variables, and schema for use by the districts and vendors of local student information systems for the development and maintenance of the extract file process.

Note: Similar to the *TREx Data Standards*, the *TREx XSD* will be updated and republished by TEA annually. Student Information System (SIS) vendors should support updates to the *TREx XSD*.

4.2 Edits and Validations

The TREx XML schema ensures that student data files from school districts adhere to a common structure and consist of valid elements and attributes. An XML extract file must be syntactically perfect, or it is rendered as unacceptable by an XML parser.

Restrictions control acceptable values for XML data elements. Restrictions on XML elements are called facets. In combination with an element's declared data type, restrictions enable the XSD validation process not only to validate the structure of the XML file but also to validate the data values contained within the file against its XML schema definition.

An example of a restriction to validate data commonly used in TREx is for a range of years. To define a rule for the ACADEMIC-YEAR data element so that the values fall within the range of 1957-2020, the TREx schema declares the restriction as:

```
<xss:element name="SchoolYear">
  <xss:simpleType>
    <xss:restriction base="xs:integer">
      <xss:minInclusive value="1957"/>
      <xss:maxInclusive value="2020"/>
    </xss:restriction>
  </xss:simpleType>
</xss:element>
```

The XML schema also enforces length restrictions for a given element by either an exact length, minimum length, or maximum length. Patterns represent another restriction on data elements if so defined.

4.3 TREx Field Edit Overview

Although the districts/campuses are provided with a manual capability to create a student record or transcript in TREx, most districts/campuses submit data in an XML-based extract file. The file is referred to as an extract file because it is created through a vendor-supported process that extracts data from a district's student information system. The extracted data must be consistent with the TREx XML Schema Definition (XSD).

Prior to transmitting the extract file, TREx verifies the structure of the file against the XSD. In addition, the system verifies the contents of the file against the declared data types and restrictions defined for each element in the TREx XSD for each simple type element. The data types and restrictions defined with the TREx XSD constitute the TREx field edits.

4.4 TREx Field Edit Restrictions

As previously described in this section, restrictions control acceptable values for XML data elements. Restrictions on XML elements are called facets. In combination with an element's declared data type, restrictions enable the TREx XSD validation process not only to validate the structure of the XML file but also to validate the data values contained within the file against its XML schema definition. Many simple type elements within the TREx XSD have a restriction that limits the domain of acceptable values.

TREx does not transmit extract files improperly structured or containing unacceptable values.

4.5 Available TREx XSD Restrictions

| Restriction | Description |
|--------------|--|
| enumeration | Specifies a list of acceptable values. |
| minInclusive | Specifies the lower bounds for numeric values. The value must be greater than or equal to this value. |
| maxInclusive | Specifies the upper bounds for numeric values. The value must be less than this value. |
| minLength | Specifies the minimum number of characters or list items allowed. Must be equal to or greater than zero. |
| maxLength | Specifies the maximum number of characters or list items allowed. Must be equal to or greater than zero. |
| minOccurs | Specifies minimum number of occurrences allowed. |
| maxOccurs | Specifies maximum number of occurrences allowed. |

| Restriction | Description |
|-------------|---|
| pattern | Defines the exact sequence of characters that are acceptable. |
| restriction | Defines the type of data element (e.g. string, integer, etc.). |
| totalDigits | Specifies the exact number of digits permitted. (Value must be greater than zero.) |
| whiteSpace | Specifies the use of white space. Denotes line feeds, tabs, spaces, and carriage returns. |

4.6 Context Edit Overview

TREx uses context edits to verify data elements against the rules set out in the XSD. Each context edit is traced to its associated Edit Number, a description of which follows.

4.7 Context Edit Descriptions

Following is a list of TREx Context Edits.

| Edit # | Element XML Name | Edit Rule |
|--------|---------------------------------|---|
| T001 | StudentID | The first character of StudentID must be “S” or “0”-“8”. |
| T002 | StudentID | Each character of StudentID must not be the same number. |
| T003 | StudentID | The first three characters of StudentID must not be “000”. |
| T004 | StudentID | If first character of StudentID is not an “S”, the fourth and fifth characters must not be “00”. |
| T005 | StudentID | If first character of StudentID is not an “S”, the last four characters must not be “0000”. |
| T006 | FirstName, MiddleName, LastName | The FirstName, MiddleName, and/or LastName must only contain the following characters: <ul style="list-style-type: none"> • a-z or A-Z • 0-9 • Apostrophe • Hyphen • Space character |
| T007 | FirstName, MiddleName, LastName | Name must not contain only apostrophes. |
| T008 | FirstName, MiddleName, LastName | Name must not contain only hyphens. |
| T009 | FirstName, LastName | Name must not contain only spaces. |

| Edit # | Element XML Name | Edit Rule |
|---------------|--|--|
| T010 | FirstName, MiddleName, LastName | Data elements cannot be repeated as PersonType (student). |
| T011 | FirstName, MiddleName, LastName | Data elements can be repeated as ParentType (parent) up to nine times. |
| T012 | DistrictID | The DistrictID contained within the CampusID must match an entry registered with the TEA. |
| T013 | CampusID | The CampusID must match an entity registered with TEA. |
| T014 | EntryDate | The EntryDate must not be greater than the file submission date. |
| T015 | WithdrawDate | WithdrawDate must not be greater than the current date. |
| T016 | WithdrawDate | WithdrawDate must be greater than ExitDate by at least one day. |
| T017 | ExitDate | ExitDate must be one day less than (earlier) than WithdrawDate. |
| T018 | WithdrawDate, WithdrawReason | If a student in grades 7-12 has withdrawn from school, both fields are required. For grades up to and including grade 6, Withdraw Reason is not required for students who have withdrawn from school, but Withdraw Date is required and entered. |
| T019 | DisciplineActionDate | Must be greater than date of extract file creation. |
| T020 | DisciplineActionDate, DisciplineActionCode, DisciplineActionReason | If data are present for any single element, all other elements must include data. |
| T021 | DisciplineActionDate, DisciplineActionCode, DisciplineActionReason | Elements can be repeated on student record if at least one element contains different data from other set. |
| T022 | TestScore, TestDate, TestCode | If TestDate (Assessment Date) is present, data are required in TestScore (Assessment Score) and/or TestCode (Assessment Score Code). |
| T023 | GradeRetained | Must be less than Grade 9. |
| T024 | CertificateDate | Must be blank if date exists in GraduationDate element. |
| T025 | GraduationDate | Must be blank if date exists in CertificateDate element. |

| Edit # | Element XML Name | Edit Rule |
|---------------|-------------------------|--|
| T027 | ImmunizationDate | If present, data are required for ImmunizationCode. |
| T028 | CreditCampus | CreditCampus must match an entity registered with TEA. |

DATA AND FILE REQUIREMENTS

The TREx extracted data are stored in an XML-based file consistent with the TREx XML Schema Definition (XSD) and must follow the XSD standards to be transmitted by TREx.

4.8 Rules for XML Schema

While school districts and campuses are responsible for the accuracy of the data transmitted through TREx, TREx verifies the contents of the file against the declared data types and restrictions defined for each element in the TREx XSD. The following business rules apply to XML schemas and the XSD validation process:

- The XML Schema supports several built-in data types (e.g., date). When an XML element has a defined data type, a restriction is placed on the element content.
- The XML Schema supports restrictions (edits). In conjunction with the element's declared data type, restrictions are used to control acceptable values for XML elements.
- Declared data types and restrictions enable the XSD validation process.
- The client-side XSD validation process is used to validate the XML file structure and data values against the schema definition.
- If the client-side validation fails, TREx does not transfer the extract file.

Note: For graphical representations of the TREx XSD, reference Appendix C.

TREX XSD DATA TYPES AND RESTRICTIONS

Following are the TREx data types and restrictions. Restrictions control acceptable values for XML elements. Restrictions used in the XSD validation process validate both the structure of the XML file and the data values against the XML Schema Definition.

APPENDIX A – ELEMENT LIST

A1: Overview

TREx uses a single XML extract file schema for both student record and high school transcript data elements. Not all data elements are used for both record types. There are twelve data elements that must be included in every extract file; otherwise the file will not load. These twelve data elements are

The Student Attendance Accounting Handbook, Part 3 Section 3-8, “Withdrawal Procedures” describes the minimum information that must be transmitted when a student transfers from one Texas public school district to another.

- Student ID (Social Security Number or State-Approved Alternate ID);
- Prior ID (Social Security Number or State-Approved Alternate ID, if different from above);
- Local Student ID Number, if used;
- County-District-Campus Number;
- Campus Name and Phone Number;
- First, Middle, and Last Name and Suffix of the student;
- Gender, Ethnicity, and Date of Birth of the student;
- Current Grade Level for the student; and

- Immunization records. Texas Education Code (TEC) §25.002(a)(3).

Home Language Survey

The U.S. Department of Education, Office of Civil Rights and Texas state law require school districts to collect information about a student's language background at the time of enrollment/registration to determine whether the student is a potential English learner. When a student enrolls in a Texas school for the very first time, a home language survey is completed. If a language other than English is identified, the student shall be tested to determine the student's language classification and eligibility for placement into a bilingual education or English as a second language program. This original home language survey is retained in the student's permanent record for the duration of the student's education.

- Original Home Language Survey
- Initial/end-of-year Language Proficiency Assessment Committee (LPAC) documentation
- Parent permission/denial forms

In addition, TEC 7.010 requires the following information to be included with the student records sent through TREx. Note that the IEP may be scanned and sent as an attached file.

- Student Course or Grade Completion
- Teachers of Record
- Student Assessment Results
- Receipt of special education services, including placement in a special education program and individualized education program developed (IEP).
- Students Personal Graduation Plan

If you have copies of documents used for student identification purposes during enrollment, those documents should be scanned and attached to the TREx record transaction for use by the receiving campus. In addition, any document that would be useful to the receiving district should also be attached, for example, the student's Home Language Survey.

Note that attachments may not be send through SPEEDE to colleges and universities.

Please be aware if you are sending a transcript to a college or university on behalf of a student who is applying for college admission, most Texas public colleges require the following information as part of their admission process.

- Class Size
- Class Rank
- Date of Class Rank
- Date of Graduation
- Graduation Program Type
- Exit Level TAKS score by Subject

The following section is a list of the TREx data elements arranged by the record type (as they would appear in a record; not within a complex type). The table indicates a data element as required in the following manner:

- | | |
|---|---|
| <input checked="" type="checkbox"/> Mandatory: the | Required within the file extract by the TREx schema, otherwise, |
|---|---|

- file will not load.
- ✓ Required by TEC: Required by state law and/or Texas Education Code. These data elements may be required for the Transcript for instance, but not for the Student Record, therefore the Schema cannot enforce their inclusion.
- ✓ Required by TEC if applicable: Required by state law and/or Texas Education Code if the data element pertains to the student. Because some data elements may not apply to every student, Homeless Indicator for instance, the Schema cannot enforce their inclusion.
- ✓ Recommended if available: Recommended by TEA, institutions of higher education, and user focus groups. If the data is available to the sending school district, it should be included in the extract file.

Note to Student Information Systems Vendors:

All Data extract programs must be able to populate all TREx data elements defined in the XML Schema, whether they are designated “Mandatory”, “Required by TEC”, “Required by TEC, if applicable”, or “Recommended if available”.

If a data element is shown as not required for the file extract but data are available and relevant to the accuracy and completeness of the student record or transcript, it is the responsibility of the campus/district to include these data.
