

DATE:	January 17, 2019
SUBJECT:	2019–2020 Perkins Reserve Grant
CATEGORY:	Competitive Grant Announcement
NEXT STEPS:	Optional Action Request: Apply for a Competitive Grant

The Texas Education Agency will distribute Perkins Reserve Grant funds to eligible local educational agencies (LEAs) through a competitive application process. Awarded funds must be used as described in the Strengthening Career and Technical Education for the 21st Century Act of 2018, Public Law (P.L.) 115-224.

Purpose of the Grant

TEA encourages continued collaboration between regional stakeholders to assess local workforce needs and to coordinate the promotion of postsecondary success. Regional stakeholders include LEAs and technical colleges, community colleges and/or universities, and industry and local entities. LEAs can establish public/private partnerships and increase the opportunities for paid internships, apprenticeships, and mentorships. An area of focus is on jobs in high wage and in-demand fields, such as information technology, manufacturing, health care, construction, transportation distribution and logistics (from [Prosperity Requires Being Bold: Integrating Education and the Workforce for a Bright Texas Future](#)).

Funding Information

Approximately five to seven grants will be awarded in *Focus Area 1: Texas Regional Pathways Network* for amounts up to \$700,000 each and 150 grants will be awarded in *Focus Area 2: Industry-Based Certifications* for amounts up to \$30,000 each.

Eligible Applicants

Focus Area 1: Texas Regional Pathways Network: Eligible applicants must include at least three school districts, one public institution of higher education, and two employers in the region. Regions are defined by the Texas Workforce Commission, in Workforce Development Areas (see <https://twc.texas.gov/partners/workforce-development-boards-websites>). LEAs and Education Service Centers (ESCs) may serve as the fiscal agent for the grant.

Focus Area 2: Industry-Based Certifications: Eligible applicants can be LEAs or ESCs. LEAs and ESCs may serve as the fiscal agent for the grant. Additionally, eligible recipients must meet at least one of the criteria below:

- The applicant provides local career and technical education (CTE) programs in rural areas. To determine if your district is categorized as rural, see <https://tea.texas.gov/acctres/analyze/1617/district1617.html>.
- The applicant provides CTE programs with high numbers of CTE concentrators or participants. CTE concentrators are students who earn three or more credits within a program or program of study, or code 2 in PEIMS. An LEA with 200 or more CTE concentrators in Grades 9–12 is considered an LEA with high numbers of CTE students. To determine if your LEA meets this criterion, see [2018–2019 Perkins Final With Reallocation by LEA](#).
- The applicant provides CTE programs with high percentages of CTE concentrators or participants. An LEA with 25 percent or more of the total student population in Grades

9–12 who are CTE concentrators is considered a high percentage LEA. To determine if your LEA meets this criterion, use the CTE code 2 counts (found at [2018–2019 Perkins Final With Reallocation by LEA](#)) and divide by your total LEA enrollment (from the PEIMS 2017–2018 Fall accepted submission on report PDM1-120-005 Student Data Review found in Standard, Student Reports).

- The applicant provides CTE programs in areas with disparities or gaps in performance as described in the Strengthening Career and Technical Education Act of 2018, Section 113 (b)(3)(C)(ii)(II).

For more general grant application process information, see the [General and Fiscal Guidelines, Eligibility To Apply for Competitive Grants](#).
