Summary of Program

1. Describe how the LEA will support campus(es) in carrying out school support and improvement activities, including how the LEA will develop a web-based improvement plan for the eligible campuses selected for this grant.

The LEA will support campuses in their improvement activities by allocating appropriate resources to their efforts. This will include establishing data review periods with both the District Administrative Team and Board to report progress and plan revisions. The district will continue to allocate financial resources to programs and activities that are producing improvement results while discontinuing ineffective and inefficient activities. The district will also adopt a web-based improvement plan that will be utilized by all campuses regardless of their eligibility. The district has identified utilizing "Data Driven Instruction" as its focus for school improvement efforts.

2. Describe how the LEA will monitor schools receiving the ESF-Focused Support Grant, including how the LEA will: (a) Monitor a web-based improvement plans upon submission and during implementation, and (b) Implement additional action following unsuccessful implementation of such plan after the first year of the grant cycle.

The district will establish an accountability calendar that will be broken down into four quarters or operational periods. The expectation will be established that each campus plan will identify strategies and tactics that will be utilized during each operational period. The strategies and tactics will be based on objectives written to meet priorities identified through the needs assessment process. Interim evaluation measures or targets will also be identified prior to the beginning of the current operational period to be used to measure effectiveness. It will also be an expectation that there will be a post-operational review by each campus team to measure progress and make necessary adjustments. At the conclusion of the last operational period, the entire plan and final results will have been reviewed to determine if efforts have been deemed successful or not. Based on these findings, the plan will be revised to meet new needs that have been identified or continue current effective efforts.

Goals, Objectives, and Strategies, Performance and Evaluation

1. Describe how the LEA will modify, as appropriate, practices and policies to provide operational flexibility to the awarded campus, that enables full and effective implementation of the Effective Schools Framework Essential Actions aligned web-based Improvement Plan.

The district will prioritize ESF Essential Actions and Improvement plans and efforts. The district will maintain this focus by refraining from adding additional programs and practices that do not contribute to or would distract from improvement efforts.

Budget Narrative

1. Describe how the proposed budget will meet the needs and goals of the program, including for staffing, supplies and materials, contracts, travel, etc. If applicable, include a high-level snapshot of funds currently allocated to similar programs. Include a short narrative describing how adjustments will be made in the future to meet needs.

The proposed budget will include expenditures to acquire resources and training to implement web-based campus improvement plans for eligible campuses. It will also include expenditures for 1-2 Principal Supervisors and team members to receive instructional coaching provided through ESC XI. Payroll expenses will also include expenditures for Instructional Coaches that will work with campus teams in curriculum development and instructional support identified through the DDI process. General supplies will also be budgeted to acquire high level curriculum materials that are aligned with the TEKS.

Budget Narrative, cont'd.

2. Describe how the LEA will align other Federal, State, and local resources to carry out the activities supported with funds received under this grant.

Other Federal, State, and Local funds will be utilized to support improvement activities for campuses that have been awarded grant funding as well as campus that do not. This will ensure that improvement activities, such as Data Driven Instruction and Web-Based Improvement Plans, can be implemented across the entire district and will allow all campuses to uniformly implement continuous improvement practices.
