

ATAC/APAC Model

Weighted score of all grades and subject **tests** at satisfactory standard and final level II standard.

Generate weighted score.

Establish range of targets for letters grades of A-F.

Assign letter grade.

Compare weighted score results to weighted score outcomes for 40 campus in a comparison group. Those who are in the top quartile receive a one letter grade bump (e.g. a B becomes an A, a C becomes a B, etc.).
