

# Summer Learning

Closing Student Learning Gaps with Summer Programming

# Summer Breaks Can Cause Learning Gaps for Students

Student achievement levels drop during the summer months, commonly referred to as the “summer slide”.

## Years of learning

### Student Type:

-  Middle-class student
-  Low-income student

### School Year Growth:

-  Students progress at same rate during school year

### Summer Growth/Slide:

-  Advanced by one month
-  Fall behind by 2-3 months

Note: No variance in amount of summer slide by grade

The impact of summer slide may create a gap of up to three grade levels for low income students by fifth grade

# Implementing High Quality Summer Programs is Effective

A study from the Rand Corporation found that summer programs with specific quality parameters eliminate summer slide.

## Study Parameters

No cost program for 5-6 weeks

Class sizes of 1:15 or smaller

Certified teachers focused on at least 3 hours of academics each day

Daily high-quality enrichment activities

Meals and transportation provided

## Impact

**15%**

of typical annual gains in math after 1 summer of high attendance (20 days+)

**20-25%**

of typical annual gains in mathematics and language arts after two summers of high attendance (20+ days)

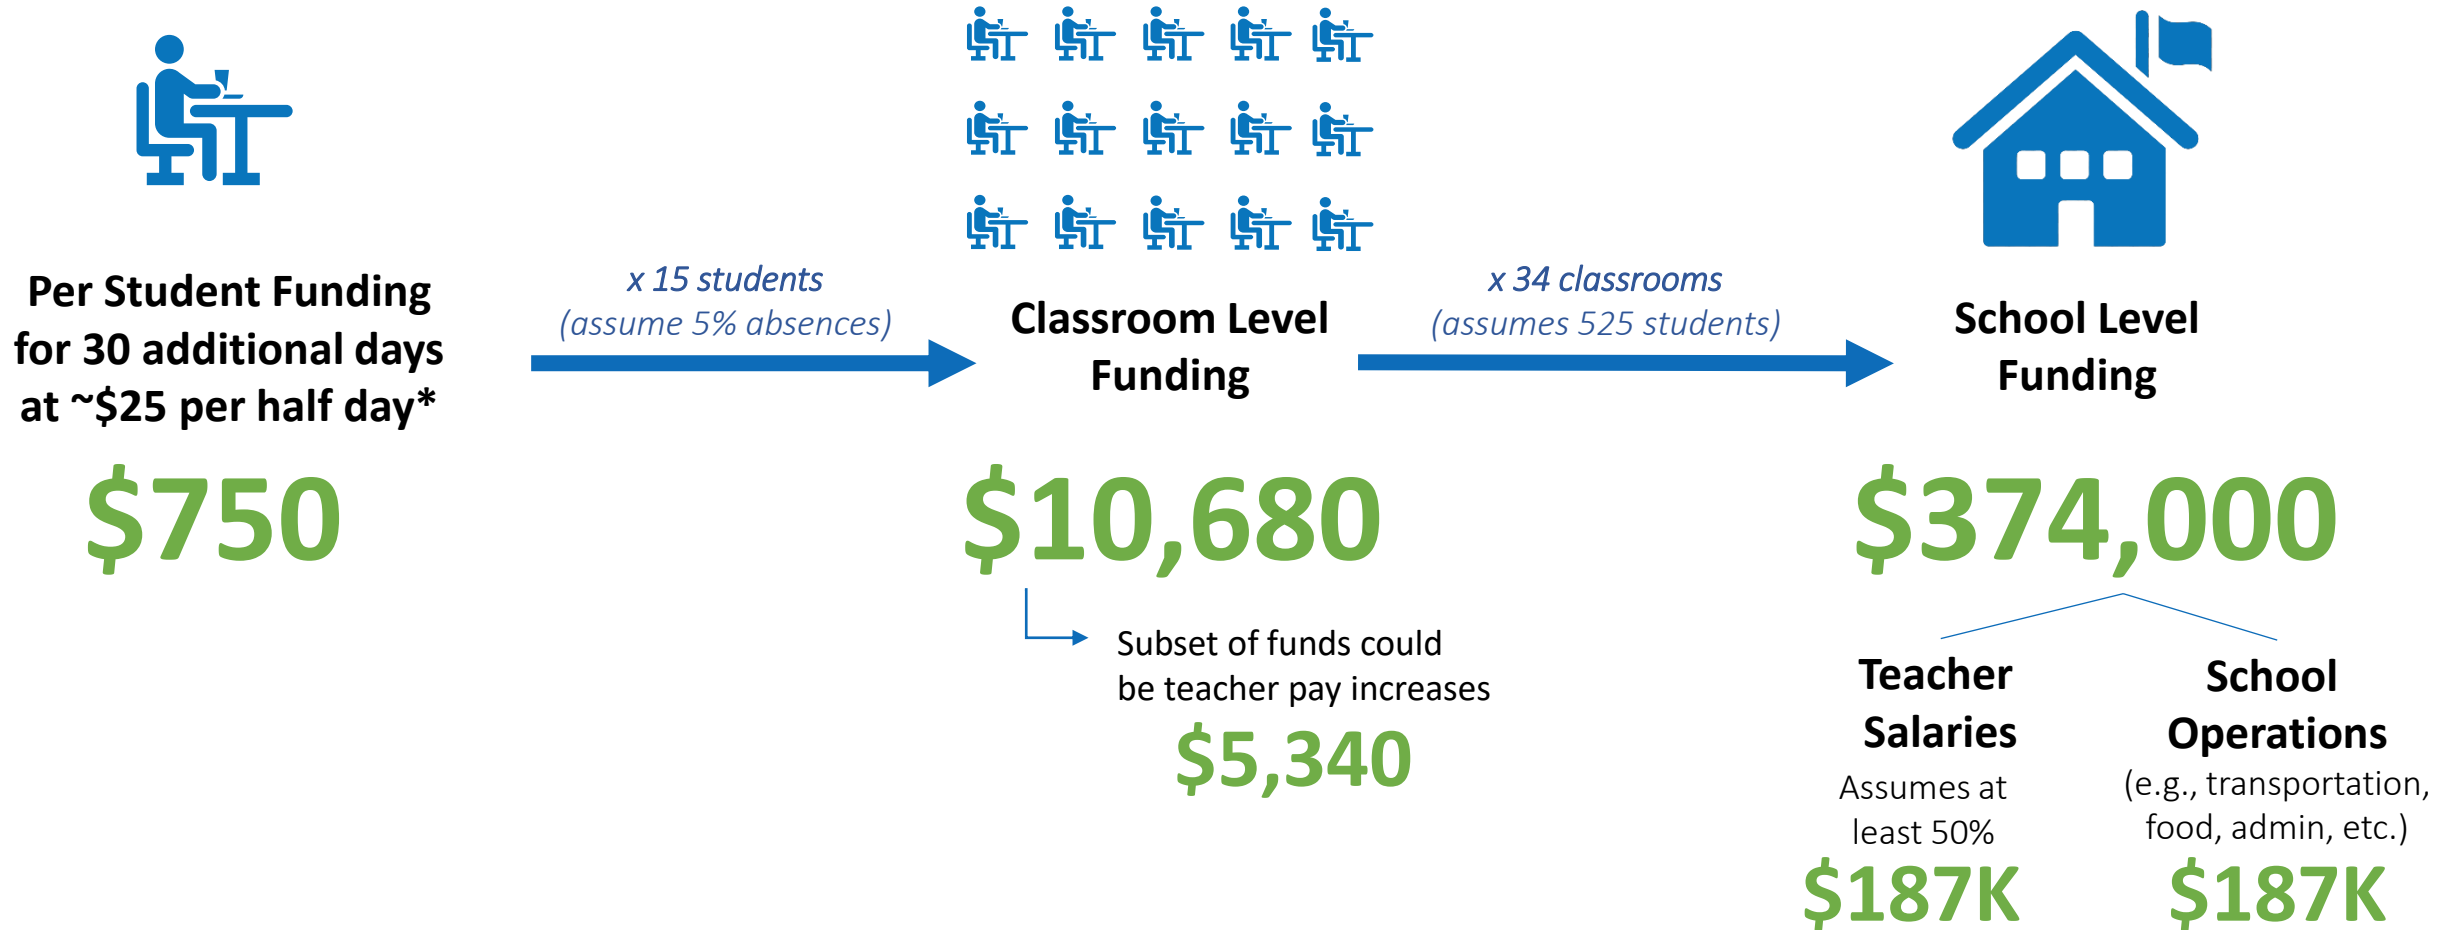

# Additional Days School Year (ADSY)

HB 3 added **half-day formula funding** for school systems that want to add instructional days (beyond a minimum 180 days, **up to 210 days**) to any of their elementary schools (grades **PK-5**).

# ADSY Sample Financial Impact Scenario

An elementary campus could utilize additional funding similar to the scenario below.

\*Example based on state average ADA funding for half day; LEAs should use local funding inputs when making any funding projections and decisions.

# In 2022, ADSY campuses outpaced the state in change in percent of students who scores approaches or better on STAAR

**Campuses using ADSY days outpaced the state average change in students scoring approaches or better on STAAR by 8 percentage points in math and in RLA.**

## Option 1: Voluntary Summer Learning

- **Purpose:** Summer Enrichment
- **Think:** 180-day traditional calendar, and up to 30 days for something additional

## Option 2: Intersessional Calendar

- **Purpose:** Targeted Remediation
- **Think:** 180 days spaced out over the full year, with intermittent breaks for targeted remediation with a subset of students

## Option 3: Full Year Redesign

- **Purpose:** Rethinking the School Day
- **Think:** A revamped 7x6-weeks calendar, daily schedule changes to increase teacher planning time and student play

# TEA has a suite of optional resources at your disposal

## Summer Learning Framework Components

- A **step-by-step project plan** to plan for summer 2023
- **Budgeting guidance** to sustainably fund your summer program with existing funding streams
- Additional **tools, templates, and district examples** to support planning your local program
